VEERANAN M

Full Stack .NET Developer

Dubai, United Arab Emirates | +971 54 754 1340 | mveeranan63@gmail.com

PROFESSIONAL SUMMARY

Full Stack .NET Developer with 3.5+ years of experience designing, developing, and maintaining web applications using .NET Core Web API and Angular. Experienced in delivering end-to-end solutions, translating business requirements into reliable and maintainable applications, and building responsive, user-focused software. Strong focus on problem-solving, application performance, code quality, and delivering effective software solutions.

TECHNICAL SKILLS

Backend: C#, .NET Core Web API, Entity Framework Core (EF Core), LINQ, Dependency Injection, Clean Architecture, Microservices

Frontend: Angular, TypeScript, JavaScript, HTML5, CSS3, Reusable Components, Responsive UI

Database: Microsoft SQL Server, Database Schema Design, SQL Queries

Authentication & Security: JWT Authentication, Refresh Tokens, OAuth 2.0, Microsoft Entra ID (Azure AD), Single Sign-On (SSO), Role-Based and Policy-Based Authorization, Data Encryption

Integrations & Services: SignalR, Hangfire, Zoho CRM API, Google Maps API, Chart.js, FullCalendar

Tools & Methodologies: Git, Azure DevOps, IIS, Postman, Swagger/OpenAPI, Serilog, Seq, Agile, Scrum

AI-Assisted Development: GitHub Copilot, Claude, ChatGPT, Cursor

PROFESSIONAL EXPERIENCE

Full Stack Developer **Apr 2024 – Present**

Compass International LLC | Dubai, UAE

- Develop and maintain full stack web applications using C#, ASP.NET Core Web API, and Angular for government, healthcare, and real estate clients, delivering features across the database, API, and UI layers.
- Build RESTful APIs within a microservices-based solution, applying Clean Architecture and dependency injection to separate business logic, data access, and presentation concerns.
- Implement data access with Entity Framework Core and LINQ against Microsoft SQL Server.
- Implemented JWT authentication with refresh tokens and enforced role-based and policy-based authorization to control access to API endpoints.
- Integrated Microsoft Entra ID (Azure AD) single sign-on (SSO) using OAuth 2.0.
- Integrated Zoho CRM REST APIs to synchronize property, customer, and sales data with the EV Connect real estate portal.
- Built real-time notifications using SignalR and scheduled background jobs using Hangfire.
- Developed Angular features for map-based location views (Google Maps API), scheduling (FullCalendar), and dashboards (Chart.js).
- Document and test APIs using Swagger/OpenAPI and Postman.
- Deploy applications to IIS and work in Agile/Scrum sprints, managing source control and work items with Git and Azure DevOps.

Software Developer **Mar 2023 – Dec 2023**

MitrahSoft Solutions Pvt. Ltd. | *India*

- Built REST APIs with ASP.NET Core Web API following Clean Architecture and dependency injection.
- Designed Microsoft SQL Server database schemas and wrote SQL queries for application features and reports.
- Implemented encryption and decryption for sensitive data fields.
- Developed reusable Angular components, business workflow screens, and custom modal dialogs.
- Integrated Serilog structured logging to support debugging and issue tracking.

PROJECTS

Sharjah Municipality – Healthcare Platform **UAE**

Technologies: ASP.NET Core Web API, Angular, SQL Server

- Government healthcare platform for managing multiple medical centers and patient workflows.
- Supports configurable services such as laboratory, vaccination, and X-ray, with role-based internal operations.

RTA – Driver Management System **Dubai, UAE**

Technologies: Angular, ASP.NET Core Web API, Microservices

- Driver management system covering accommodation, test scheduling, and identity processing.
- Includes e-test, psychometric evaluation, health test, and Emirates ID workflows.

EV Connect – Real Estate Portal **Dubai, UAE**

Technologies: ASP.NET Core Web API, Microservices, Angular, Zoho CRM API

- Real estate portal for customers, developers, brokers, and internal users to manage property data, sales, and reporting.

Fleet Management System **Madurai, India**

Technologies: Angular, ASP.NET Core Web API

- Delivery management system connecting customers, the company, and drivers.
- Supports route planning, bulk order booking, and delivery tracking.

EDUCATION

Bachelor of Engineering in Computer Science Engineering **2022**

SACS MAVMM Engineering College | *Madurai, India*

CERTIFICATIONS

- Diploma in Java Programming
- Internship Training in Python Programming

LANGUAGES

English (Professional), Tamil (Native)
